

James

AI SaaS Developer Full-Stack Web Developer

hello@ivsoftapp.com | Remote, worldwide | <https://ivsoftapp.com> | <https://github.com/> | <https://linkedin.com/>

PROFESSIONAL SUMMARY

I'm an independent software developer passionate about building useful technology. Over the years I've designed and developed AI applications, SaaS platforms, ERP systems, POS software, dashboards and automation tools for real business scenarios. I enjoy solving complex problems, improving workflows and transforming ideas into software people actually enjoy using. My development process focuses on clean architecture, intuitive user experience, scalable systems and long-term maintainability.

CAREER OBJECTIVE

Great software isn't just about writing code - it's about understanding people, simplifying difficult problems and building products that create real value.

CORE SKILLS

AI Application Development | Full-Stack Web Development | React | TypeScript | JavaScript | Supabase | PostgreSQL | REST APIs | Authentication | Progressive Web Apps | Dashboard Development | Business Automation | ERP Systems | POS Systems | Inventory Systems | CRM Solutions | Prompt Engineering | Responsive UI | Performance Optimization | Cloud Deployment

TECHNOLOGY STACK

Frontend: React, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3
Backend: Supabase, PostgreSQL, Authentication, REST APIs, Edge Functions
Deployment: Vercel, GitHub, Cloud Platforms
AI: OpenAI Integration, Prompt Engineering, AI Workflows

SERVICES OFFERED

- * AI SaaS Development - Ship AI features that hold up in production.
- * Custom Web Applications - Built around your workflow, not a template.
- * Business Software - Internal tools that replace spreadsheets and chaos.
- * ERP Development - Unify sales, inventory, staff and reporting.
- * POS Systems - Fast, reliable point-of-sale for real counters.
- * Dashboard Development - Turn raw data into decisions you can act on.
- * Startup MVP Development - From idea to deployed product, quickly.
- * Workflow Automation - Remove the manual work you shouldn't be doing.
- * AI Integration - Add LLMs and generative features to existing apps.
- * API Development - Clean, versioned APIs your team can rely on.
- * Progressive Web Apps - Installable, offline-capable, fast.

FEATURED PROJECTS

IVSoft Hub - AI-powered app ecosystem

A centralized ecosystem of AI-powered business and productivity applications, unified under one intelligent account.

Stack: React, TypeScript, TanStack, Supabase, Tailwind

Live: <https://ivsoftapp.com>

SmartPOS ERP - All-in-one business platform

Point of sale, inventory, restaurant, hotel, customer management and reporting in one cohesive platform.

Stack: React, TypeScript, Node, PostgreSQL

WORK EXPERIENCE

Independent Software Developer | Remote | Ongoing

- * Design and develop AI-powered SaaS applications, ERP, POS and dashboard systems end-to-end.
- * Architect production-grade web applications with React, TypeScript, backend services and PostgreSQL.
- * Integrate LLMs, payments, authentication and role-based access control across multi-tenant apps.
- * Own the full lifecycle: discovery, design, implementation, deployment and long-term maintenance.
- * Deliver clean, scalable, maintainable code with a focus on real business outcomes.

DEVELOPMENT APPROACH

Understand the problem > Plan the solution > Design the experience > Build with clean architecture > Test thoroughly > Deploy confidently > Provide long-term improvements

WORK STYLE

Remote Collaboration | Agile Development | Rapid MVP Delivery | Clean Code | Scalable Architecture | Production Deployment | Continuous Improvement | Long-Term Support
